Discover stevia: the revelation among natural sweeteners

What is Stevia?

Stevia Rebaudiana Bertoni is a small green plant, originated from the borderland between Paraguay and Brazil. The small leaves contain stevioside, a potent sweetener which is 300 times sweeter than ordinary sugar.

The plant also contains rebaudioside A, which is even sweeter than stevioside and with a less bitter aftertaste. Thanks to Stevia's enormous sweetening power, only a minimal dose is needed for a sweet taste.

Why haven't we heard about this before?

Stevia has been used for centuries as a natural sweetener in countries such as China, Japan, Korea, Taiwan, Israel, Uruguay, Brazil and Paraguay. In Japan, Stevia is, for example, used in soft and fizzy

drinks as a healthy alternative to aspartame. Due to the emergence of cheaper sugar and synthetic sweeteners, the effectiveness of Stevia remained a well-kept secret in Europe. Until now that is...

Cavalier proudly presents: Stevia chocolate

Unlike sucrose or artificial sweeteners, Stevia is good for your health. That is why Cavalier is launching

quality chocolate with Stevia extract. With Stevia you can enjoy the delicious taste of cocoa!
